senoson®

HIGH GLOSS FILMS

with market leader know-how

 Exceptional high gloss level	 Good scratch resistance	 Increased UV resistance
 Environment friendly	 Recyclable	 Small scratches can be polished out

As a pioneer and technology leader in the highly complex extrusion production process, Senoplast can quickly respond to new demands from the market by providing innovative solutions. **senosan®** high gloss films are always meeting the needs of new design trends and enriching the furniture market worldwide with unmistakable surface quality, excellent gloss effect and unique depth of gloss.

Thanks to our 60 years of experience and highly specialized know-how. Senoplast is a well-known guarantor of reliable products with consistently high quality.

senosan® Products for furniture surfaces

Product Front Material	Finish	Scratch resistance	Gloss level (60°)	Thickness (mm)	Color	Application	Availability
senosan® AM1500X(U)	Surface protection film, Corona on reverse	Class 4E 0.6 N Erichsen DIN 68861/T4	Gloss units app. 90	0.45 – 1.40	Colored	Flat lamination, post-forming	upon request
senosan® AM1500X MET.	Surface protection film, Corona on reverse	Class 4E 0.6 N Erichsen DIN 68861/T4	Gloss units app. 90	0.80	Colored, metallic	Flat lamination, post-forming	upon request
senosan® AM1700X(U)	Surface protection film, Corona on reverse, polished surface	Class 4E 0.9 N Erichsen DIN 68861/T4	Gloss units app. 90	0.45 – 1.40	Colored	Flat lamination, post-forming	upon request

Product Rear-side Material	Finish	Gloss level (60°)	Thickness (mm)	Color	Application	Availability
Polystyrene senosan® HP17RS	sonora 017DB embossing, Corona on reverse	Gloss units app. 3	0.50 and 0.70	Colored	Flat lamination, reverse side	ex stock
ABS/PMMA senosan® AM1450RS	sonora 017DB embossing, Corona on reverse	Gloss units app. 5.5	0.50 – 0.80	Colored	Flat lamination, reverse side	upon request

Upon request, material is available in other thicknesses and in rolls from 0.45 mm.

senosan® AM1800TopX

Premium product in high gloss with hardcoat finish

The great depth effect and clearly improved features of this scratch-resistant, coated, high gloss lacquered film wins over customers – with all colors including metallics.

senosan® sheets and films differ from other materials on the market due to their unique surface features. Senosan has taken its long-established furniture films and added an inline “surface coating” TopX in the cleanroom production facility.

TopX scratch resistance is infinitely superior to other high gloss surfaces. Chemical and stain resistance is so improved that it can even be used in laboratory applications, and UV resistance has been greatly increased for color stability.

In order to ensure this tried and tested senosan® quality, these high value furniture films are produced exclusively under “cleanroom” conditions.

Excellent gloss level

Excellent scratch resistance

Scour resistant

No polishing after removal of protective film

Increased UV resistance

Exceptional chemical resistance

Technical details

Product	Finish	Scratch resistance	Gloss level (60°)	Thickness (mm)	Color	Application	Availability
senosan® AM1800TopX(-1)	Surface protection film, Corona on reverse, coating	Martindale IHD-W-466 Class 1	Gloss units app. 90	0.70	Colored	Flat lamination	ex stock
senosan® AM1800TopX MET.	Surface protection film, Corona on reverse, coating	Martindale IHD-W-466 Class 1	Gloss units app. 90	0.80	Colored, metallic	Flat lamination	ex stock

i All materials are available in sheets from stock.
On request, material is available in other thicknesses as well as in rolls from 0.45 mm.

senosan® AM1800TopMatt AF

Premium product in supermatt surface quality with hardcoat finish and anti-fingerprint effect

In addition to high-gloss fronts, matt surfaces are increasingly being requested in the living area. Senosan has foreseen this market development and in response has introduced a new production line producing supermatt quality.

These new supermatt surfaces with anti-fingerprint effect offer the same high quality surface features as high gloss furniture films. They are the latest benchmark in the industry. Their scratch and abrasion resistance is significantly higher than standard matt surfaces.

Moreover, **senosan®** AM1800TopMatt AF is powerfully resistant to chemicals – even suitable for laboratory use as it resists most aggressive substances.

Excellent anti-fingerprint effect

Outstanding stain resistance

Supermatt, smooth surface

Excellent scratch resistance

Scour resistant

Increased UV resistance

Exceptional chemical resistance

Pleasant surface feeling

Easy to clean and maintain

senosan® AM1800TopMatt AF films are available in seventeen market-adjusted trend colors and can be offered ex stock in two sizes (2800 x 1300 mm or 2440 x 1220 mm).

Technical details

Product	Finish	Scratch resistance	Gloss level (60°)	Thickness (mm)	Color	Application	Availability
senosan® AM1800TopMatt AF	Surface protection film, Corona on reverse, coating	Class 4B > 2.0 N Erichsen DIN 68861/T4	Gloss units < 5	0.50	Colored	Flat lamination	ex stock
senosan® AM1800TopMatt AF MET.	Surface protection film, Corona on reverse, coating	Class 4B > 2.0 N Erichsen DIN 68861/T4	Gloss units < 8	0.5 – 0.7	Colored, metallic	Flat lamination	ex stock

All materials are available in sheets from stock.
On request, material is available in other thicknesses as well as in rolls.

Delivery range

On time, fast and reliable: all imaginable colors supplied in both brilliant and supermatt quality. As soon as a color sample has been produced, you can rely 100 % on its depth effect and intensity.

- » Sampling of any color is possible (quantity dependent)
- » On individual request, material is available in other thicknesses, widths and in rolls.

FACTS

Before ordering our **senosan®** products, please be sure to ask us for an original color sample! All colors in this brochure are for orientation only. They are in no way legally binding! All rights reserved to make product and color changes.

NOTE

senosan® – a compact solution

From film to finished panel

Front material: **senosan®** film

Counter surface/rear side material:

Lightly embossed PS film **senosan®** HP17RS (0.50 and 0.70 mm) in white and black available ex stock – further colors available on request. **senosan®** AM1450RS, ABS/PMMA with higher scratch resistance available upon request.

Edge material:

Our co-operation partner Hranipex (www.hranipex.com) supplies edge materials in identical colors.

The complete solution for a finished panel!

senosan® GLASS

glossy or matt finish – news about the furniture design

Glass fronts create an elegant appearance in interior design. Real glass however is a very demanding and sensitive material when it comes to impact and cleaning properties.

The solution: **senosan®** TopX GLASS and **senosan®** TopMatt GLASS – high quality surfaces with a glass effect giving the appearance of depth. This co-extruded material combines the aesthetic advantages of real glass fronts with the processing and practical advantages of **senosan®** sheets. **senosan®** GLASS is available in high gloss and matt optics (milk glass). In addition to the colored version, the product is also available in transparent (clear).

Trend colors

The 2 mm thickness creates a glass effect optically enhanced by color-matched milled edges. To avoid bowing or bending of the finished parts after lamination, a **senosan®** rear-side balancing sheet material in 2 mm is available.

SENOSAN® ECO

For the sake of the environment and sustainability

Senoplast has been focusing on sustainability for many years, both in our products and in manufacturing processes, as well as throughout the entire company. The new **senosan® ECO** product line presents a new generation of furniture films, largely made from recycled plastics. The recycling concept developed by Senoplast ensures that almost all production and processing wastes can be reused in manufacturing processes.

A new regrind processing plant processes plastic recyclates from the market for re-use in production.
