

Circular Access Panel Technical Data Sheet

PRODUCT DETAILS

GYPSA Circular Gypsum Board Access Panel is based on the design principle. The panels are easily finished to match gypsum ceiling or wall. The quality and finish of our circular ceiling access panel has become the industry standard for high-end construction projects.

STANDARD FEATURES

- Frame: Galvanized 180 Grade, 1.50 mm thick Steel (ASTM A653)
- Lock: Concealed hardware (frame, latch & hinge)
- Finish: Jotun Powder Coated and are available in any RAL color.
- Frame: Fits all 12.5 mm thick Standard RG, MR, FR, FM, Antibacterial and Sound bloc Gypsum wallboard inlay
- Available Sizes: Standard 30 / 45 / 60mm Diameter & customized sizes are available upon request.
- Application: Ideal for Drywall Ceilings & Partitions in Residential, Commercial & Industrial Buildings where design requirement is circular shape.

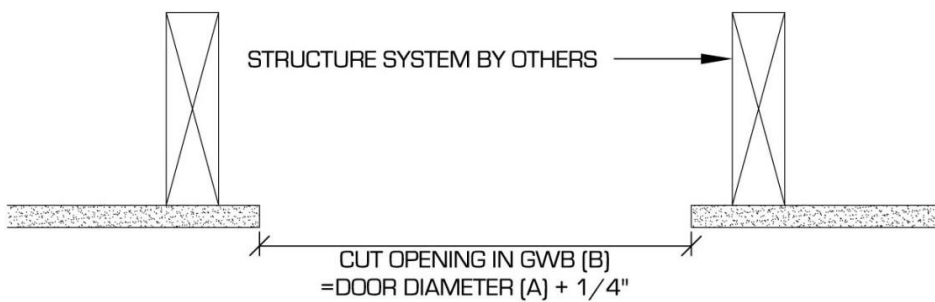

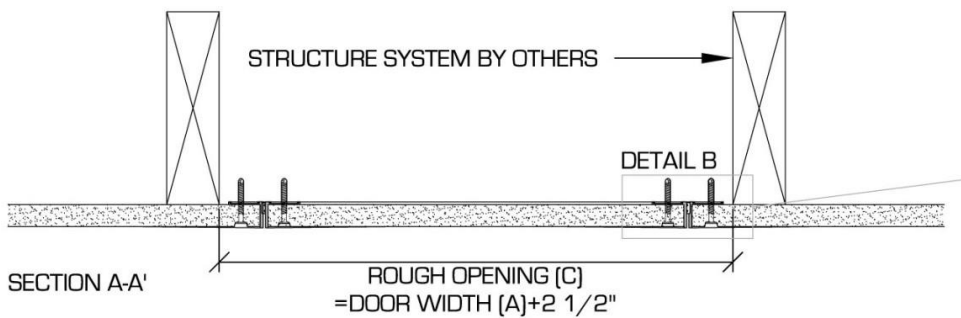

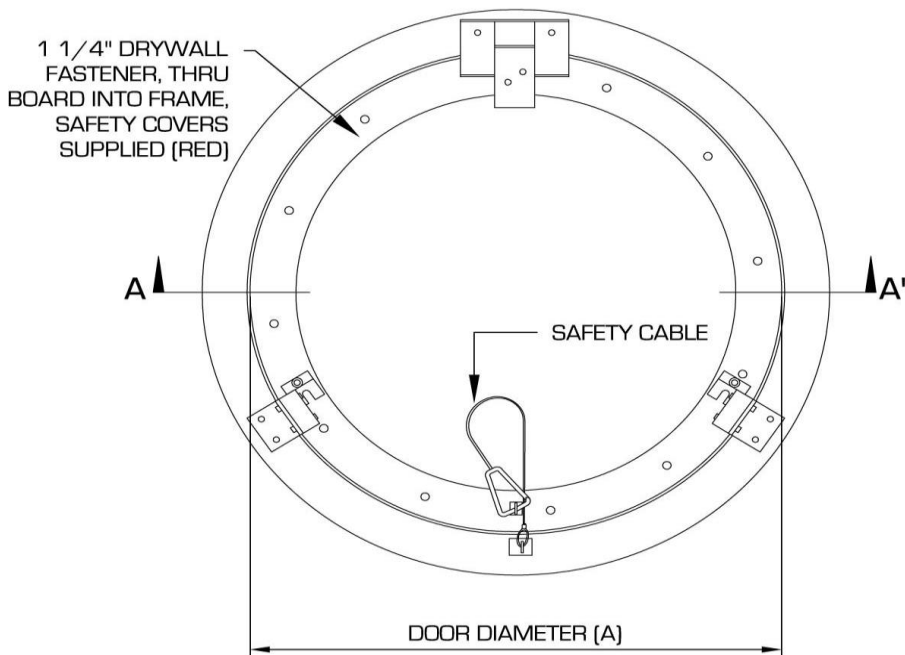

BENEFITS

- Easy installation with common trowel tools and included fasteners Gypsum surfaces suited to elegant and functional treatments.
- Consistent continuous surfaces for virtually invisible access (only a 1.50 mm void remains visible)
- Rough openings in GWB without abutting structures.
- Fully removable door panel with safety cables

APPLICATIONS

- All assemblies clad in gypsum wall board 12.5mm
- For ceiling installations
- For new construction or repairs.
